SHUTTERS
THE CHOICE IS YOURS

LIGHT AND SHADE:
CREATE THE LOOK YOU'VE ALWAYS
DREAMED OF

Shutters are a stylish and versatile option, as they come in a range of colours and can be made to fit any size window or door. From vintage charm to contemporary minimalism, shutters bring an instant shot of laid back style into your home.

“Instantly the room is transformed and the light is under my control”

The Blindtex range is available in different wood types all beautifully crafted to suit a variety of needs and budgets. Choose from an array of different shutter styles and louvers, all with an unparalleled array of wood stained finishes to choose from.

• ADD COLOUR

You can choose to have your shutters match your colour scheme by opting for one of thousands of custom colours.

Unlike cheaper imitations, all Blindtex Shutters are given 6 coats of paint or stain to give a tough, lustrous finish. To help prevent fading, the final layer is UV protected.

“Taking control of your surroundings, adding functional style and privacy”

BLINDTEX SHUTTERS
MORE VERSATILE
THAN ANY OTHER
WINDOW COVERING

- **ULTIMATE LIGHT CONTROL**

Each panel can be independently adjusted to temper the light. Either open the panels or tilt the louvers to expose the exact amount of light required.

- **PRIVACY**

Shutter panels can be divided into independently controlled sections allowing natural light in but keeping unwelcome attention out. Ideal for suburban living; popular installations include bedrooms, bathrooms and street facing windows.

- **SOUND INSULATION**

Adding an additional layer to your glazing, shutters not only block out light but help reduce noise levels too.

- **INSULATING AND ECONOMICAL**

Blindtex shutters not only keep you cool during the summer, they can also reduce your heating costs in the winter.

- **LOW MAINTENANCE**

Unlike dusty curtains, our shutters are quick and easy to clean and offer a virtually maintenance free existence - excellent for dust allergies!

Waterproof shutters (ABS) with stainless steel hardware

BLINDTEX SHUTTERS **PERFECT** IN EVERY DETAIL

- DESIGNED INDIVIDUALLY

It is important that the correct configuration is specified.

Shutters should always be tailored to suit your windows and interior.

We will advise and recommend the best solution for your windows and discuss the correct louvre width, frame type, midrail positioning, hinge colours and panel configuration.

• TAKE CONTROL

To tilt the louvers, rods can be in the centre or to the side of the panels. For a contemporary look we can hide the tilting mechanism completely. For out of reach areas or for added luxury try our motorised shutters operated via solar technology, and controlled with RF remote control, with timer facility.

DESIGNED TO SUIT YOUR LIFESTYLE

Blindtex have the perfect solution for any room.

No matter what the size or shape, we can help you choose the best product to meet your requirements.

▲ TIER-ON-TIER

Using two sets of Shutters in one frame at your window - one to cover the bottom half, and the other to cover the top half - allows even greater control over light and privacy. Each set opens independently of the other, so you can keep the bottom set closed for privacy while having the top set wide open to enjoy your view and let the light flood in.

BI-PASS ▼

Unobstrusive and easy to use great for certain installations.

Bi-pass panels

“Let your mind be creative and our professionals will do the rest.”

► CAFE STYLE

Add a continental feel to your home with cafe style Shutters. They're fitted to the bottom half of the window, allowing the light in while providing privacy at the same time.

▼ TRACKED

Tracked shutters work well in conjunction with bi-fold doors allowing you to concertina large runs of shutters out of the way and bring the outside in.

Bi-fold panels

MADE-TO-MEASURE SOLUTIONS TO SUIT ANY **WINDOW SHAPE**

Even the most unusual window shapes can be catered for within the Blindtex range. Most popular styles include arches, circles and triangular shapes.

SHUTTER SHAPES

Below is a selection of the most popular shapes that our customers ask for and demonstrates the flexibility of our shutter solutions.

PARALLELOGRAM

DESIGNED TO FIT

Our shutters are ideal for arched or angled windows. We can provide an effective solution where many window coverings fail.

FANTASTIC RANGE OF STYLES & MATERIALS

Our specialists will help design a look that suits your home. Shutters can be traditional or modern. We will survey and design shutters that match your needs and life style precisely.

“A choice of louvered or solid panels, natural stains and a carefully selected palette of painted finishes will ensure that your shutters blend into even the most traditional of surroundings.”

full height panels

sunburst arch with horizontal T Post

MDF

MDF is a strong and cost effective option. Made from engineered wood and polymer coated, which gives the MDF shutter a wipe clean and maintenance free finish. There are seven shades of white and cream to choose from. Shaped shutters are not available in this material type.

MDF PLUS

This is a mixed material painted product which provides the shutter with a more natural finish than the standard MDF product. This more closely resembles the finish of a hardwood shutter. The frames and stiles are coated in a polypropylene sleeve and the louvers are made from ABS. This is a very hard wearing combination protecting from changes in ambient temperature and eliminating the risk of insitu moisture changes that can cause warping and twisting.

PHOENIX

The ideal choice for most shutter installations. Phoenix is a hardwood with a rich textured grain that looks fantastic in a wide range of finishes. With simple clean lines these shutters are ideal for today's modern living. With 50 stains and colours available, you will find the ideal choice for your home.

Incorporated blackout blind (optional)

WHITE TEAK

Made from Forest Stewardship Council certified wood. White Teak (Tectona grandis) is a highly sought after and valuable tropical hardwood due to its favorable physical properties and high natural durability. Teak timber has low shrinkage and medium density making it suitable for a wide range of purposes such as joinery, cabinet making, veneer, outdoor furniture and boat decking. They are well suited to areas where extra durability is required.

ABS (WATERPROOF)

This material is extremely hard wearing, making it ideal for commercial installations. Our Waterproof shutters are manufactured using a hardwood core combined with an ABS (Acrylonitrile Butadiene Styrene) plastic coating. This co-polymer coating is extremely tough and resilient and is the same material that is used in the manufacture of American football helmets.

INFINITY

Our entry level hardwood shutters are made with MDF frame and real hardwood shutters panels. This shutter range is available in 6 modern painted colours, fitting comfortably into many decor styles, including both traditional and contemporary.

COMPARISON CHART (For more detail, please ask your dealer.)

Name	MDF	MDF +		
	Polypropylene Coated MDF	Polypropylene Coated MDF with ABS louvers		
Paint Colours	7	21
